

NEXUS EOC

User Interface Guide — Fields, Panels, and Interactions

This document describes every panel, field, and interactive element in NEXUS EOC.

SETUP SCREEN

Field / Element	Type	What It Does	How to Interact
Scenario Cards	<i>Selection</i>	Choose the incident type. Each card shows the scenario name, icon, and a brief description of the operating environment.	Click any card to select. Selected card highlights with a green left border and dot. Click another to change selection.
Jurisdiction Type	<i>Dropdown</i>	Sets the operating environment. Drives AI world generation — determines location, named agencies, and resource constraints.	Click dropdown, select from 6 options: Rural County, Mid-Size City, Large Urban Metro, Coastal Community, Tribal Nation, Interstate Corridor.
Jurisdiction Description	<i>Auto-display</i>	Describes the selected jurisdiction type including population context, resource base, and key operational constraints.	Read-only. Updates automatically when jurisdiction changes.
Difficulty	<i>Dropdown</i>	Sets how rigorously the AI evaluates your decisions and how many complications surface each turn.	Select from: Basic (1 complication), Moderate (2), Advanced (2-3, professional rigor), Brutal (ruthless), Adaptive (scales to your performance).
Difficulty Description	<i>Auto-display</i>	One-sentence explanation of what the selected difficulty level means in practice.	Read-only. Updates automatically.
Launch Button	<i>Action</i>	Initiates scenario generation. AI builds a location-specific world based on scenario and jurisdiction, then populates the game screen.	Click when scenario is selected. Displays loading state while world generates (3-10 seconds).
Bottom Status Bar	<i>Display</i>	Shows current selections: EOC Network, Mode, Scenario, Jurisdiction, Difficulty, and Status.	Read-only. Updates live as you change selections.

COMMUNITY LIFELINES BAR

Field / Element	Type	What It Does	How to Interact
Lifeline Tiles (x8)	<i>Display / Hover</i>	Real-time status of all 8 FEMA Community Lifelines. GREEN = operational, YELLOW = degraded,	Hover any tile to see the AI reasoning for the current status. Read-only otherwise.

		RED = compromised. Updates every turn.	
Settings Button (⚙)	<i>Toggle</i>	Opens the Display Settings panel for font size and color customization.	Click to open/close. Panel appears top-right of screen.
Info Buttons (i)	<i>Toggle</i>	Appear next to panel headers throughout the interface. Explain what each panel does.	Click any info button to open a callout. Click anywhere else to close.

LEFT COLUMN

Field / Element	Type	What It Does	How to Interact
Media Feed	<i>Auto-display</i>	AI-generated fictional news headlines reflecting the current state of the incident. LIVE badge marks current-turn headlines. Older headlines fade to gray.	Read-only. Scroll to see older headlines. Use to inform JIC and public information decisions.
Reference Links	<i>Links</i>	Curated real-world doctrine documents and after-action reports relevant to the active scenario type.	Click any link to open in a new browser tab. Scenario-specific, does not change during play.
ESF Reference Panel	<i>Interactive list</i>	All 15 Emergency Support Functions with number, name, lead agency, and description. Track which ESFs you have activated.	Click any ESF card to mark ACTIVE. Click again to deactivate. Player tracking only — AI does not see selections.
Left Column Dividers	<i>Drag handle</i>	Horizontal drag handles between the three left column panels allow vertical resizing.	Click and drag up or down to resize panels.

FIELD DISPATCH

Field / Element	Type	What It Does	How to Interact
Dispatch Cards	<i>Auto-display</i>	Incoming field reports from the incident. NEW cards (green) are from the current turn. Older cards fade to gray but remain in the log.	Read-only. Scroll to review older dispatches. New items appear at top each turn.
Dispatch Count Badge	<i>Display</i>	Red badge in the panel header showing total number of dispatch items in the log.	Read-only.

SCENARIO TERMINAL

Field / Element	Type	What It Does	How to Interact
Terminal Log	<i>Display</i>	Main narrative window. Shows scenario header, player actions (green), AI consequence text (gray), time stamps, and prompts for next action.	Read-only. Auto-scrolls to latest entry after each turn.
Situation Status Badge	<i>Display</i>	Color-coded: green (STABLE), yellow (DEVELOPING), orange (CRITICAL), red (DETERIORATING). AI assessment of incident trajectory.	Read-only. Updates each turn.
Action Input Box	<i>Text entry</i>	Where you type decisions as the senior EM on scene. Be specific — name resources, priorities, who owns what, what you are communicating.	Click to focus, type action, press Enter or click Execute. Shift+Enter for new line.
Execute Button	<i>Action</i>	Submits your action to the AI for evaluation. Disabled when input is empty or AI is processing.	Click, or press Enter in the input box.
New Button	<i>Toggle</i>	Opens a dialog to end the current scenario with two options.	Click to open. Choose End with AAR (full after-action review) or End without AAR (returns to setup immediately).
ENDEX Command	<i>Text command</i>	Type ENDEX to end the scenario and trigger a full After-Action Review.	Type ENDEX in the action input and press Execute or Enter.
Input Area Drag Handle	<i>Drag handle</i>	Thin bar above the input area. Drag to resize the input box vertically.	Click and drag up to expand, down to shrink.

RIGHT COLUMN

Field / Element	Type	What It Does	How to Interact
Commander Notepad	<i>Free text</i>	Persistent scratch pad for priorities, resource gaps, and pending decisions. Saves automatically across browser sessions.	Click and type. Nothing here affects the simulation.
Turn / Difficulty Footer	<i>Display</i>	Shows current turn number and difficulty level at the bottom of the notepad.	Read-only.
Incident Map	<i>Interactive map</i>	Live map of the incident area. Color-coded pins mark infrastructure. Turn-numbered pins mark AI-generated event locations.	Click any pin for a popup with label, type, and status. Zoom and pan freely.
Static Infrastructure Pins	<i>Map layer</i>	Colored pins placed at scenario launch: green (EOC), blue	Click to open popup. Cannot be moved or removed.

		(hospitals), orange (staging), purple (shelters), red (affected/hazmat/fire).	
Dynamic Event Pins	<i>Map layer</i>	Dark pins with white turn numbers (T1, T2 etc.) dropped by AI when dispatch events have a physical location.	Click to open popup showing label, turn, type, and status note.
Right Column Divider	<i>Drag handle</i>	Horizontal drag handle between the notepad and the map panels.	Click and drag up or down to resize.

DISPLAY SETTINGS

Field / Element	Type	What It Does	How to Interact
Font Size Slider	<i>Range slider</i>	Adjusts base font size across the game screen. Range: 9px to 16px.	Open Settings via the gear button. Drag slider left for smaller, right for larger.
Accent Color	<i>Color picker</i>	Controls highlight color for player text, active elements, and selections. Default: teal.	Click a preset swatch or use the color picker for a custom color.
Alert Color	<i>Color picker</i>	Controls color for timestamps and prompts. Default: amber.	Click a preset swatch or use the color picker.
Reset to Defaults	<i>Button</i>	Restores all display settings to factory defaults.	Click Reset to Defaults at the bottom of the settings panel.
